

BABATUNDE ABDULSALAM KEHINDE

Lagos, Nigeria | +2348037339348 | Abdulsalambabatunde52@gmail.com [LinkedIn Profile](#) | [GitHub Portfolio](#)

PROFESSIONAL SUMMARY

Forward-thinking **AI-Augmented Software Engineer and Workflow Automation Specialist** specializing in leveraging Generative AI ecosystems, advanced code-generation engines, and rapid development frameworks to accelerate software delivery. Highly skilled in utilizing modern "Vibe Coding" paradigms, OpenAI Codex, Antigravity, and LLMs to rapidly architect, debug, and deploy full-stack applications. Proven track record of cutting traditional development times from weeks to days by combining intelligent AI engineering agents with robust backend automation workflows.

CORE COMPETENCIES

- **AI & LLM Technologies:** Generative AI, Prompt Engineering, OpenAI Codex, Large Language Models (GPT-4, Claude 3.5, Gemini), AI-Assisted Development
- **Development Environments & Frameworks:** Antigravity, Cursor, Replit Agent, Claude Engineer, GitHub Copilot, VS Code
- **Workflow Automation:** n8n, API Integration, Webhooks, Low-Code/No-Code Architecture
- **Technical Engineering:** Full-Stack Web Development, AI-Driven Debugging, Rapid Prototyping, Git & GitHub

TECHNICAL PROJECTS

FixMate | *Lead AI-Augmented Developer*

- **Description:** Designed and developed a digital web platform aimed at helping users locate and verify trusted, local home service providers.
- **AI Workflow:** Deployed **OpenAI Codex** and Cursor to rapidly prototype frontend structures and generate secure database schemas, scaling the backend using **Antigravity** principles to cut setup time by 70%.
- **Tech Stack:** Python, Codex Engine, Antigravity, API Integrations, Git.

NaijaFit | *Lead AI-Augmented Developer*

- **Description:** Engineered and deployed a localized, high-performance fitness web application tailored to lifestyle and health tracking for the Nigerian market.

- **AI Workflow:** Utilized Cursor and modern prompt engineering to rapidly architect responsive UI components, streamline styling, and ensure an optimal mobile-first user experience.
- **Tech Stack:** Frontend Frameworks (React/Next.js), Vercel (Deployment), Tailwind CSS, Git.

ClickForge | *Automation & Brand Engineer*

- **Description:** Engineered a high-end, minimal, and futuristic brand identity concept focused entirely on showcasing cutting-edge AI and automation services.
- **AI Workflow:** Combined advanced prompt engineering with automated design generation frameworks to establish a premium tech-startup aesthetic seamlessly.

PROFESSIONAL EXPERIENCE

10Alytics Business | *AI-Assisted Developer (Project-Based) Lagos, Nigeria* | 2025 – May 2026

- Built, refactored, and deployed production-ready web applications using advanced Vibe Coding techniques in Cursor, significantly reducing traditional engineering cycles.
- Integrated **OpenAI Codex** and Claude Engineer to debug complex Python logic, optimize algorithms, and refactor legacy code, achieving a documented **90% reduction in technical debt**.
- Leveraged **Antigravity** tools to execute high-velocity coding sessions and manage rapid application deployment pipelines.
- Designed and executed sophisticated **n8n workflow automations** to bridge third-party APIs and streamline data handling.
- Collaborated dynamically with autonomous AI agents to test, iterate, and patch software features rapidly with minimal manual coding overhead.

EDUCATION & CERTIFICATIONS

10Alytics Business Cohort *Web Development & AI-Assisted Software Engineering* | Completed: May 2026

Certified AI & Web Development Practitioner *10Alytics Business* | 2025
